## SUMMARY

Full-stack developer experienced in building and deploying scalable web applications using React, Node.js, FastAPI, and MongoDB. Skilled in backend development, REST APIs, authentication systems, and ML-integrated applications. Seeking SDE internship opportunities.

## EDUCATION

**Veer Madho Singh Bhandari Uttarakhand Technical University**  
*B.Tech in Computer Science and Engineering* CGPA: 7.75/10

Dehradun, Uttarakhand  
Sept 2023 – Present

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, C++, SQL  
**Frontend:** React.js, Tailwind CSS, HTML5, CSS3  
**Backend:** Node.js, Express.js, FastAPI, REST APIs, JWT Auth  
**ML/AI:** Scikit-learn, Random Forest, Groq LLaMA API, Prompt Engineering  
**Databases:** MongoDB, MySQL  
**Tools & DevOps:** Git, GitHub, Postman, Vercel, Render, Environment Config  
**Concepts:** DSA, OOP, DBMS, OS, Computer Networks

## PROJECTS

- Vehicle Breakdown Prediction** | *React.js, Node.js, FastAPI* | GitHub | Live Demo Mar 2026 – Apr 2026
- Trained a Random Forest classifier on 10,000+ vehicle sensor records to classify 5 fault categories, achieving 64% accuracy on imbalanced real-world data with no labeling pipeline.
  - Built a FastAPI microservice exposing 4+ ML inference endpoints with JWT-secured auth; integrated with a React dashboard for real-time vehicle health monitoring.
  - Deployed the full-stack application on Render and Vercel with separate development and production environment configurations.
- AI Code Reviewer** | *React.js, Node.js, Groq API, LLaMA* | GitHub | Live Demo Jan 2025 – Feb 2025
- Built an AI-powered code review platform using Groq's LLaMA inference API, delivering sub-second syntax, logic, and optimization feedback across 5+ languages (Python, JS, Java, C++, SQL).
  - Designed a stateless Node.js/Express backend with language-specific prompts to improve code review accuracy and reduce irrelevant suggestions.
  - Deployed on Vercel with a responsive React frontend featuring reusable editor components with syntax highlighting; used by peers for code submissions and interview prep.
- Doctor Appointment System** | *React.js, Node.js, Express.js, MongoDB* | GitHub Apr 2025 – May 2025
- Architected a full-stack booking platform with role-based access control (patient/doctor/admin) using JWT + bcrypt, supporting complete scheduling workflows end-to-end.
  - Designed and documented 12+ REST API endpoints (CRUD for appointments, users, and availability slots) in Express.js and MongoDB, with Postman-tested contracts.
  - Shipped separate patient and doctor dashboards on Vercel with responsive Tailwind CSS UI; role-gated routes enforce strict access policies across all user types.

## EXPERIENCE

- Web Development Intern** Remote  
*CodSoft* Jun 2025 – Jul 2025
- Built 3 client-facing web projects using HTML5, CSS3, and JavaScript while meeting weekly sprint deadlines.
  - Reduced redundant CSS by ~30% across projects by implementing mobile-first layouts with reusable component classes, improving maintainability for the handoff team.

## ACHIEVEMENTS & CERTIFICATIONS

**Competitive Programming:** Solved 500+ DSA problems across GeeksforGeeks and LeetCode with strong problem-solving skills in arrays, trees, graphs, recursion, and dynamic programming.

**Hackathons:** Ranked among the Top 8 teams out of 70+ participating teams in a competitive hackathon by building a full-stack solution under limited time constraints.

**Certifications:** Introduction to MongoDB (MongoDB, 2024) | Python & C Training Program (IIT Bombay, 2024)
